## INVITED SESSION SUMMARY

**Title of Session:**

Signal Processing Algorithms and Pattern Recognition Techniques for Automated Identification/Classification Systems

**Name, Title and Affiliation of Chair:**

Dr. Paolo Crippa, Department of Information Engineering, Università Politecnica delle Marche  
Prof. Claudio Turchetti, Department of Information Engineering, Università Politecnica delle Marche

**Details of Session (including aim and scope):**

Signal processing and pattern recognition are fundamental issues in the design of many automated identification/classification systems.

In these systems input data are typically acquired using sensors, then a representation of the acquired data is usually obtained using a feature extraction algorithm, and finally a decision is made based on the feature vector.

Particular interest is addressed to automated systems based on pattern classification such as speech and face recognition systems, medical and healthcare decision making systems (based on ECG, EEG, sEMG, PPG signals), industrial quality control systems.

This session aims to present original, unpublished results on recent advances in signal processing algorithms and pattern recognition techniques for automated identification/classification systems. The suggested but not limited scope of the session includes the following topics:

- Healthcare Applications of Pattern Recognition
- Industrial and Medical Applications of Pattern Recognition;
- ECG, EEG, sEMG, PPG Based Recognition Systems;
- Human Activity Monitoring and Classification;
- Machine Learning for Data Modeling;
- Face Recognition;
- Speaker Recognition: Identification and Verification;
- Speech Recognition;
- Artificial Intelligent Techniques and Recognition;
- Document Processing and Recognition;
- Fuzzy and Hybrid Techniques in Pattern Recognition;
- Statistical & Structural Pattern Recognition;
- Neural Networks;
- Parallel and Distributed Pattern Recognition;
- Dimensionality Reduction in Pattern Recognition;
- Robotics and Remote Sensing Applications of Pattern Recognition;
- Shape and Texture Analysis;
- Signal Processing and Analysis;
- Special Hardware Architectures;
- Embedded Systems.

Not only theoretical papers but also practical application papers will be welcome.

Submissions for the conference must be made as complete papers (there is no abstract submission stage) submitted as PDF documents through the [PROSE online submission and review system](#).

The guide length for full papers is 8 to 10 pages (maximum).

Follow the [KES 2020](#) guidelines for more information on paper submission.

**Publication:**

Full papers will be reviewed by the IPC and if accepted and presented, they will be published in Elsevier's [Procedia Computer Science](#) open access journal, available in ScienceDirect and submitted to be indexed/abstracted in CPCI (ISI conferences and part of Web of Science), Engineering Index, and Scopus (to be confirmed).

**Important dates:**

- Submission of papers: **4 May 2020.**
- Notification of acceptance: **18 May 2020.**
- Final paper publication files to be received by: **29 May 2020.**
  
- Conference: Verona, Italy, 16 – 18 September 2020.

**Main Contributing Researchers / Research Centres (tentative, if known at this stage):****Website URL of Call for Papers (if any):****Email & Contact Details:**
